Index to Volume 11

Authors, Titles, and Subjects

Abstracts of papers from scientific sessions, 17th National Meeting of AACC, 786–831
Acetanilid, 1064
Acetone
  blood, 1023
  gas chromatography in, 805
Acid phosphatase, 998
  serum prostatic, 943
Acetophenetidin, 1064
N-Acetyl-p-aminophenol, in urine, 1064
Adaptation of Babson's method for the determination of serum glutamic oxalacetic transaminase in the clinical laboratory, by M. Furuno and A. Sheena, 23
Aeration-diffusion apparatus, for blood ammonia, 512
Affinity of organic compounds for free electronis with thermal energies, by A. Zlatkis and J. E. Lovelock, 259
Agaricus campestris, 324
AGUAYO, S. E. Abstract, 814
Air-cooled extractors and their use in determination of cholesterol, by F. E. Holmes, 44
Albumin, serum, 798
  direct spectrophotometry of, 478
  dye-binding method for, 441
ALEXANDER, R. L., JR. Abstract, 812
Alizarinsulfonate, sodium, for serum calcium determination, 716
Alkaline phosphatase, 789, 815
  serum, 876, 889
  urinary inhibitor of, 570
Alkylating agents, 58
ALLEN, D. *see* CRANSWICK, E. H.
Amanita phalloides, 323
American Association of Clinical Chemists (AACC)
  national committees, 1965-66, 971
  National Executive Committee Minutes (April 13, 1965), 1073
  National Executive Committee Minutes (August 31, 1965), 1078
    Education and Scholarship Committee report, 1086
    Membership Committee report, 1083
    Standards and Controls Committee report, 1084
  Placement Service, 161, 614
    see 17th National Meeting of the AACC
  Stated Annual Meetings (Sept. 1965), 1088
p-Aminophenol, 1064
Ammonia, blood, 512
Amniotic fluid, 814
Amylase, serum, 97, 786, 787, 862
  electrophoretic and chromatographic distribution of, 97
  inhibitor of, 787
Anachem conference, 1965, 972
Analog computation of electrophoresis patterns, by L. A. Lotito *et al.*, 386
Analysis of biological materials by atomic-absorption spectroscopy, by J. B. Willis, 251
ANDERSEN, D., and SHOEMAKER, W. C. Method for tissue hemoglobin analysis, 422
ANNINO, J. S., LIPSON, M., and WILLIAMS,

Pages 1–90, January; 91–162, February: *Part 1;* 163–366, February: *Part 2;* 367–454, March; 455–540, April; 541–616, May; 617–680, June; 681–740, July; 741–832, August; 833–904, September; 905–978, October; 979–1044, November; 1045–1112, December.

L. A. Determination of 3-methoxy-4-hydroxymandelic acid (VMA) in urine by thin-layer chromatography, 905
ANSTALL, H. B., and TRUJILLO, J. M. Determination of free fatty acids in plasma by a colorimetric procedure: an appraisal of the method and comparison with other technics, 741
Aortography, abdominal, 808
APPLETON, H. D.
Abstract, 794
Preface: Special Supplement, 5th International Congress on Clinical Chemistry, 163
Application of a glucose-oxidase method to serum (Abstract), by A. G. Ware, 792
ARVAN, D. A. Abstracts, 791, 799
Ascorbic acid, 979
ASSIMOS, A., *see* MATHER, A.
Atomic absorption spectrophotometry
of copper and zinc, 803
of serum iron, 793
Atomic-absorption spectroscopy, 251
Attapulgite absorption for gonadotropin, 575
Automated and manual direct methods for the determination of blood urea, by W. H. Marsh *et al.*, 624
Automated determination of acid phosphatase, by B. Klein *et al.*, 998
Automated determination of NAD-coupled enzymes (Abstract), by B. Klein, 801
Automated determination of serum glutamic oxalacetic transaminase (Abstract), by S. Morgenstern, 801
Automated determination of serum iron, by B. Zak and E. Epstein, 641
Automated flame photometry, 633, 794
Automated fluorometric determinations of serum glutamic oxalacetic transaminase and serum glutamic pyruvic transaminase (Abstract), by J. B. Levine, 802
Automated fluorometric method for determination of lactic dehydrogenase in serum, by L. Brooks and H. G. Olken, 748
Automated fluorometric method for determination of serum calcium, by J. B. Hill, 122
Automated method
for acid phosphatase, 998
for alkaline phosphatase, 815
for bilirubin, 793
for blood urea, 624
for catecholamines, 986
for cholinesterase, 802
for enzymatic determination of glucose, 840
for glucose, 792
for glucose in urine, 367
for lactic dehydrogenase, 748
for phenylalanine, 541
for serum calcium, 122
for serum glutamic oxalacetic transaminase, 801, 802
for serum iron, 641
for serum phosphate, 821
for uric acid, 427
for urine creatinine, 664
using I^{131}-triiodothyronine binding, 959
Automated method for serum inorganic phosphate determination (Abstract), by H. H. Nishi, 821
Automated method for the determination of sulfonamides in plasma, by H. B. Falk and R. G. Kelly, 1045
Automated method for urine creatinine which does not require a dialyzer module, by S. Pino *et al.*, 664
Automated methods for blood glucose and urea (Abstract), by B. Fingerhut, 803

Pages 1–90, January; 91–162, February: *Part 1;* 163–366, February: *Part 2;* 367–454, March; 455–540, April; 541–616, May; 617–680, June; 681–740, July; 741–832, August; 833–904, September; 905–978, October; 979–1044, November; 1045–1112, December.

Automatic micro glucose determination with a 60-second direct-reading analyzer (Abstract), by F. Lim, 792
Automated p-nitrophenylphosphate serum alkaline phosphatase procedure for the AutoAnalyzer, by S. Morgenstern *et al.*, 876
Autmoated p-nitrophenylphosphate serum alkaline phosphatase procedure for the "Robot Chemist," by S. Morgenstern *et al.*, 889
Automated procedure for blood phenylalanine, by J. B. Hill *et al.*, 541
Automated technic for the assessment of thyroid status, based upon the binding of I^{131}-triiodothyronine by serum, by A. C. Pollard *et al.*, 959
Automated trihydroxyindole procedure for the differential analysis of catecholamines, by R. L. Robinson and D. T. Watts, 986
Autophoresis, protein, 819
AUERBACH, J.
Abstract, 801
see KLEIN, B.
see MORGENSTERN, S.

BABSON, A. L. Abstract, 789
BABSON, A. L., and PHILLIPS, G. E. Improved colorimetric transaminase assay, 533
Babson's method, for serum glutamic oxalacetic transaminase, 23
BAGINSKI, E. Abstract, 814
BARBERO, J. M. Abstract, 787
Barbiturates, 137
in blood, 436
paper chromatography of, 37
Basis for elevation of serum glutamic pyruvic transaminase levels in serum stored on clots, by W. B. Elliott and H. Rosamilia, 29

Clearance studies in the eludication of kidney function (Abstract), by H. Lubowitz, 829
Clearance tests, mathematical interpretation of, 817
Clinical analyses for trace elements by neutron activation (Abstract), by H. H. Kramer, 820
Clinical application of enzyme activity measurements in body fluids with special reference to current problems, by J. H. Wilkinson, 239
Clinical Chemist, The, 80, 159, 450, 538, 613, 669, 733, 832, 899, 971, 1042, 1071
Clinical chemistry and public service, by J. G. Reinhold, 84
Clinical evaluation of renal function (Abstract), by J. H. Magee, 831

Pages 1–90, January; 91–162, February: *Part 1;* 163–366, February: *Part 2;* 367–454, March; 455–540, April; 541–616, May; 617–680, June; 681–740, July; 741–832, August; 833–904, September; 905–978, October; 979–1044, November; 1045–1112, December.

Closed-system apparatus for aeration-diffusion: application to determination of blood ammonia, by F. E. Holmes, 512
Clot timer, 17
Clotted blood, SGPT levels in, 29
CO_2, micro-method, 818
COLE, D. R.
Abstract, 790
see TAN, Y. L.
see THIERS, R. E.
COLEMAN, C. M. Abstract, 815
Colorimetric lactic acid dehydrogenase method (Abstract), by J. H. Boutwell, Jr., 790
Colorimetric, uric acid procedure, 427
Comparison of a colorimetric (automated) with an enzymatic (manual) uric acid procedure, by J. B. O'Sullivan *et al.*, 427
Comparison of bilirubin determinations by automated and hand methods (Abstract), by J. Davison, 793
Comparison of salting out technics for plasma fibrinogen with a microsulfite technic (Abstract), by J. F. Goodwin, 798
Comparison of the effects of tolbutamide and phenethylbiguanide on hepatic protein synthesis (Abstract), by L. R. DeChatelet, 800
Comparison of total serum protein determinations by the biuret method and technicon autophoresis (Abstract), by T. C. Huang, 819
Comparison of two current colorimetric procedures for determination of serum glutamic oxaloacetic transaminase, by R. M. Nakamura *et al.*, 846
Computer data processing on-line from automatic analytical instruments in a clinical chemistry laboratory, (Abstract), by E. Cotlove, 816
Concentrating spinal fluid for protein electrophoresis, 1068
Concentration of cerebrospinal fluid proteins and their fractionation by cellulose acetate electrophoresis (Abstract), by A. Kaplan, 799
CONKLIN, J. D., and HOLLIFIELD, R. D. New method for the determination of nitrofurantoin in urine, 925
CONNERTY, H. V. Abstract, 815
CONNERTY, H. V., and BRIGGS, A. R. Determination of serum calcium by means of sodium alizarinsulfonate, 716
CONNEY, A. H., *see* WELCH, R. M. 1064
Conversion of p-hydroxyphenolic acids to aldehydes (Abstract), by B. B. Bourne, 812
COOPER, T. B. *see* CRANSWICK, E. H.
Copper, 803
Copper content of saliva in Wilson's disease (Abstract), by E. W. Rice, 822
Correlation of urine and serum enzyme activities in myocardial infarction (Abstract), by A. A. Dietz, 795
COTLOVE, E.
Abstract, 816
see PEACOCK, A. C.
Coulometric determination of protein nitrogen: application to direct titration of Kjeldahl digests, by G. D. Christian, *et al.*, 413
Coulometric determination of urea nitrogen in blood and urine, by G. D. Christian, *et al.*, 700
CRANSWICK, E. H., ALLEN, D., COOPER, T. B., and PITI, T. Vacuum manifold for use of erythrocyte uptake of T_3 technic, 77
Creatine in blood serum: its determination with creatine phosphokinase (Abstract), by A. C. Kibrick, 791
Creatine kinase, 796, 951

Pages 1–90, January; 91–162, February: *Part 1;* 163–366, February: *Part 2;* 367–454, March; 455–540, April; 541–616, May; 617–680, June; 681–740, July; 741–832, August; 833–904, September; 905–978, October; 979–1044, November; 1045–1112, December.

Creatine phosphokinase, 791, 795
activity in serum, 814
Creatinine
determination of, in serum and urine, 763, 791
urine, 664
Critical evaluation of methods for the determination of the total hydroxyproline content of serum and urine (Abstract), by A. Saifer, 823
Cystic fibrosis, 787

Data processing in clinical chemistry, by A. C. Peacock *et al.*, 595
Data processing system, 807, 816, 822
DAVIDOW, B., *see* FASTLICH, E.

Dehydrogenase
α-hydroxybutyric, 795
lactic, 748, 790, 795
Desferrioxamine-B-methane sulfonate, in serum and urine, 818
Design of an analog-current to pulse rate converter for study of reaction rates by spectrophotometry (Abstract), by H. V. Connerty, 815
Determination of blood phosphorus (Abstract), by E. Baginski, 814
Determination of calcium in urine by the chloranilate method, by W. W. Webster and W. H. Kern, 855
Determination of copper and zinc in biological material by atomic absorption spectrophotometry (Abstract), by M. M. Parker, 803
Determination of free fatty acids in plasma by a colorimetric procedure: an appraisal of the method and comparison with other techniques, by H. B. Anstall and J. M. Trujillo, 741
Determination of glucose in biologic fluids with an automated enzymatic procedure, by M. Robin and A. Saifer, 840
Determination of homogentisic acid in urine, by R. E. Stoner and B. B. Blivaiss, 833
Determination of 3-methoxy-4-hydroxmandelic acid (VMA) in urine by thin-layer chromatography, by J. S. Annino, 905
Determination of microgram quantities of inorganic boron in mammalian specimens, by T. Konikowski and L. E. Farr, 378
Determination of proteins in spinal fluid for differentiation of neurological diseases (Abstract), by N. M. Papadopoulos, 822
Determination of serum calcium by means of sodium alizarinsulfonate, by H. V. Connerty and A. R. Briggs, 716
Determination of serum iron by atomic absorption spectrophotometry (Abstract), by D. O. Rodgerson, 793
Determination of thiamine in small amounts of whole blood and serum by a simplified thiochrome method, by T. Myint and H. B. Houser, 617
Determination of total iodine in urine, stool, diets, and tissue, by J. Benotti *et al.*, 932
Determination of urea in blood and urine with diacetyl monoxime-glucuronolactone reagent, by T. Momose *et al.*, 113
Determination of vanilmandelic acid in urine by anion exchange analysis (Abstract), by G. C. Mills, 811
Diet, iodine in, 932
DIETZ, A. A. Abstract, 795
3,4-Dihydroxyphenylalanine, 563
Direct photometric analysis of serum calcium with glyoxal bis-(2-hydroxyanil) (Abstract), by M. Mager, 804

Pages 1–90, January; 91–162, February: *Part 1;* 163–366, February: *Part 2;* 367–454, March; 455–540, April; 541–616, May; 617–680, June; 681–740, July; 741–832, August; 833–904, September; 905–978, October; 979–1044, November; 1045–1112, December.

Direct-reading bilirubinometer incorporating hemolysis and turbidity correction, by S. H. Jackson, 1051
Direct-reading "bilirubinometer" incorporating hemolysis and turbidity correction (Abstract), by S. H. Jackson, 820
Direct spectrophotometric determination of albumin in human serum, by F. L. Rodkey, 478
Discussion of the symposium on enzymes in clinical chemistry, by K. S. Henley, 247
Disorders of bilirubin metabolism: the Warner-Chilcott lecture, by G. H. Lathe, 309
Diacetyl monoxime-glucuronolactone reagent, for urea determination, 113
